EASY OPERATION / CLEANING

JUICING EXPLAINED

"The advantage of juicing raw vegetables is that when the juice is separated from the fibre, the great majority of nutrients stay in the juice. Since the fibre has been removed, these fresh, living nutrients in the juice can get into the bloodstream and to cellular level within minutes, without the time-consuming and energy-depleting normal digestion process. Juicing vegetables is one of the best sources of nutrients to build and regenerate the body."
